To: Element Materials Technology
18100 S Wilmington Ave
Rancho Dominguez, CA 90220

Subject : SIM-13 Certification

Date: 07/16/2013

Attention: Julie Nguyen

Greetings:

Element Materials Technology is granted full certification to perform Nondestructive Test (NDT) Inspection to the requirements of Pratt & Whitney (P&W) NDT Method Specification SIM-13. Full certification is based upon the successful survey performed at Element on July 8, 2013, and your previous certification for SIM-314.

Don Clemons is certified as the SIM Level 3 for SIM-13 based on his current qualifications.

A Level 3 certification may be revoked whenever there is a valid reason to question the quality of NDT Inspection or process control or if there is proof that the responsibilities of the Level 3 are unfulfilled.

Element Materials Technology has elected to utilize P&W Specification SIM-13.

Very truly yours,

Wesley Larkin
